Learning objectives:

- a) By the end of the study day, delegates will have:
- b) Gained greater awareness and understanding of relevant and topical issues, developments and challenges in paediatric palliative medicine.
- c) Obtained updated knowledge on communicating with children about death and dying.
- d) Increased their knowledge of supportive care around common symptoms in paediatric palliative care.

Who should attend?

- Paediatric palliative care doctors; encompassing paediatricians, hospice doctors, specialist GPs and trainees.
- Senior nurses and nurse consultants as well as specialist allied professionals working at a senior level in paediatric palliative medicine.
- APPM members and non-members alike.
