

SUGGESTED PHARMACY STOCK LIST - April 2024

An amalgamation of stock lists from Helen & Douglas House, Acorns Hospice and Children's Hospices Across Scotland

The Hospices that come together in the Hospice Medical Leads Group represent a range of services built to meet palliative care needs but also adapted to local needs and services. As such we appreciate that hospices vary in their access to and emphasis on prescribers, specialist clinicians and pharmacists. In addition, the services around each hospice may support varied levels of relationship with pharmacies and medication providers.

We provide this list to assist hospices considering having a stock provision of medications, with the aim of providing a suggested list of end of life and generalist medications that may be useful in a hospice setting. We know that not all services require stock medications and support a varied approach that meets local needs.

DRUG NAME	STRENGTH	PREPARATION	PACK SIZE	STOCK LEVEL	WHERE KEPT	COMMENT	SUGGESTION
ADRENALINE (EPINEPHRINE)	1 mg in 1ml 1 in 1000	INJECTIONS	10	1	Injectables/ orange bag		Essential (general)
